"The commencement of Mr. Clay's political career may be dated as far back as be, year 1797—a period at which he had scarcely began the jeactice of law. The people of Kentucky were then about a clock aconvention to frame new constitution for the State, and one feature."

The true principles of slavery were not then understood. It alarmed the prejudices of the multitude, and Mr. Clay's powerful vindications of it were regarded by many, as the brilliant but wayward efforts of a young votation of ambition striving to attract attention by the startling and parislosical character of his opinions, than the remits of a calm and deliberate conviction of right. Whenever a slave brought an action at law for his liberty, Mr. CLAY voluntered as his professional in the slave, at that early period, been a portion of his being, and have at that early period, been a portion of his being, and have through life. In all stations he has pleaded AFRICAN FREEDOM, without fear from high or low. To HIM MORE than any other individual, is to be ascertained that GREAT REVOLUTION which has taken place in the public sentiment upon this migest; a revolution, tied to the wilds of your native land. Ah! tied to the wilds of your matrix fresh to move onward, sail they I wish I had been born a native of the fresh each the goal of universal respon. A conviction of the expediency and accessity of EMANCIPATION, has been spreading farther among our countrymen, and taking deep, r and deeper root in their minds, and it requires not the spirit of prophecy to forestell the END.—

This rapid and continued trigingh of the PRINCIPLES of which it was the object of Mr. CLAYS first political labora to establish, may well be a source of pride to him, and honest exultation of his friends.

The supplementary of the prophecy to forestell the END.—
